

# Tasin Islam

Software Engineer · MERN Stack Developer · Cyber Sec. Enthusiast

I am a passionate learner of programming and software engineering. Interest in MERN stack development mainly stemmed from working on my thesis at university which was based on Euler Rotational Angle by Threejs library and Mediapipe Face Mesh and also from a distinct fondness for JavaScript. I have worked on several projects from basic to advanced level. Also I've been attracted to cybersecurity and machine learning after taking some introductory courses. So I am eager to build a career in this domain. Still learning and mastering many basic and advanced things of programming.
